SINCE 1986

COMPANY PROFILE

We “Pali Machine Tools”, founded in the year 1986 are a well known Sole Proprietorship company that is betrothed in manufacturing a wide range of Rolling Machines, Trimming Machine, etc. When we started our business, we have constructed a wide infrastructural unit that is situated at Ludhiana (Punjab, India) and assists us to make world class range of machines as per the global set standards. Under the headship of our Proprietor “Mr. Jaspal Singh Jabbal”, we have gained the trust of our valued clients. The machines offered by us have endless applications in mechanical, textile and many other sectors. Our Ludhiana (India) based company has maintained its high-profile image in the industry for years. The range of machinery, which we have been supplying contains Double Spindle Drilling Machines, Automatic Trimming Machines, Flat Die Thread Rolling Machines, Vertical Thread Rolling Machines, etc. Over the years, our organization has earned customers' respect & trust for our products & services

An international rating agency It aims to fill a strategic void by grading international agricultural policies and practices and by providing pertinent, credible and reliable information to the various concerned parties. Strengthening research potential as well as investment, productivity and employment abilities for agricultural and agribusiness operations with the aim of on-going consumer satisfaction and security.

We are actively committed towards offering our prestigious patrons with world class machines as per the industry set standards within minimum time period and at most genuine rates.

SINCE 1986

### COLD HEADING MACHINE

Cold Heading Machines, offered by Pali Machine Tools are the special types of metal blanks, which can be shaped into several parts.

These are operated via electricity and utilize the high speed automatic cold-headers. These are made to transmute a wire into a different and intricately molded part. Cold Heading Machines are provided with a cold heading process, which is volume specific. Their use ensures zero loss of material and less minimal scraps. They are appropriate for various sorts of cold forming operations, such as pointing, sizing, trimming, thread rolling, piercing, blank rolling, etc. Automation they have allow them to exhibit a constant operational fluency, without compromising on precision.

### THREAD ROLLING MACHINE

Thread Rolling Machines are capable to produce threads through the flow as well as displacement of metals into a specific thread shape. These are utilized to produce studs, screws and bolts. The machines are provided with a cold-form forming operation and assist in the making of external screw threads.

SINCE 1986

### BOLT HEAD TRIMMING MACHINE

We are successfully meeting the varied requirements of our clients by providing the best quality range of Bolt Head Trimming Machine.

### VERTICAL THREAD ROLLING MACHINE

Vertical Thread Rolling Machine reduces cutting waste and save much material and time to reduce production cost and meanwhile greatly expand the production capacity. This machine is manufactured under the direction of our expert professionals by using latest technologies keeping in mind the set quality norms.

Further, it is checked by our quality controller on different quality parameters before delivering to our valued customer end. Our offered Vertical Thread Rolling Machine is known for their unique features like electro-mechanical rolling slide drive, options for process visualization and robust construction.

SINCE 1986

### NAIL POINTING MACHINE

Being one of the renowned firms in the industry, we are involved in providing a high-quality array of Nail Pointing Machine.

### HYDRAULIC THREAD ROLLING MACHINE

Hydraulic Thread Rolling Machines, offered by Pali Machine Tools are the special types of metal blanks, which can be shaped into several parts.
